Agency

Client work, one place.

Boards, cards, team chat and a client chat, for agencies of five.

The problem

Client work lives in too many places.

The task is on a board, the feedback is in a chat, the brief is in an email thread and the file is called `final_v4.pdf`. Agency gives every client project one home.

What every project gets

A board, Kanban or List

One board per client. Switch views without losing your order.

Cards that hold the work

Checklists, files up to 25 MB each, comments, @mentions and due dates.

A Team channel

Internal chat for the project. Clients never see it.

A Client chat

Talk to the client where the work is, and link the card.

Search everything with ⌘K

Cards, comments and messages in one search.

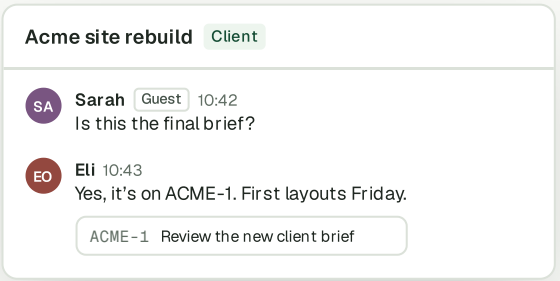

Inbox, Import and dark mode

Mentions land in your Inbox; bring boards in with Import.

Built for your clients

Invite the client, not the chaos.

- ✓ Clients join as guests and see their project's board and its Client chat.
- ✓ Never the Team channel, other projects or who is assigned.
- ✓ Guests don't use a seat.

Move one client in this week.
